

LETTER OF RECOMMENDATION

for

Andrija Kunarac

Dragoslava Srejavica 74I/2, 11160 Belgrade, Serbia

January, 2012

To Whom It May Concern:

It's my pleasure to write this letter in support of **Andrija Kunarac**. I have had the pleasure to know him as a student at the Faculty of Electrical Engineering.

I have had the opportunity to work with a wide variety of students, including many with **Andrija Kunarac**'s level of on-the-job experience. However, few were as open to learning and embracing new concepts as **Andrija Kunarac**. From first day, it was clear that he wasn't there just for the certificate; he truly sought to better his own electrical engineering skills (especially optical networking skills) and put them to use for projecting, installing and maintaining networks.

We had done together one article »Architecture of PSPON optical access network« and presented him on Telecommunications Forum in Belgrade.

As the member of the commission for the Andrija's final exam for Master Degree level, I was very satisfied with his thesis and presentation.

I wish that I had more students like Andrija. He is bright, personable, and dedicated. I know that he has a bright future ahead of him in telecommunications.

Sincerely,

Petar Matavulj, Ph.D., Associate Professor

Faculty of Electrical Engineering

University of Belgrade
